2	Please select the proper operation mode according to your needs: Access Point - Transform your existing wired network to a wireless network. Multi-SSID - Create multiple wireless networks to provide different security and VLAN groups. Repeater(Range Extender) - Extend your existing wireless coverage by relaying wireless signal. Bridge with AP - Combine two local networks via wireless connection. Client - Acting as a "Wireless Adapter" to connect your wired devices (e.g. Xbox/PS3) to a wireless network.
